EDUCATION

Madhav Institute of Technology & Sciences

B.Tech in Computer Science and Engineering; Current CGPA: 7.17

Gwalior, India

2024 – Present

Higher Secondary (CBSE)

Score: 81%

2023

Secondary (ICSE)

Score: 90.2%

2021

TECHNICAL SKILLS

Java & Backend Development: Java 17+ (Core, Collections, Multithreading, Streams API), Spring Boot, Servlets, JSP, JDBC, RESTful API Architecture.

Other Languages & Web: C/C++, JavaScript, Python, HTML5, CSS, React, Tailwind CSS.

Databases & Storage: PostgreSQL (Preferred Relational DB), MongoDB, MySQL, File-based data persistence.

Tools & Environment: IntelliJ IDEA (Project structuring, External JAR & Dependency Mapping), Git, Linux/CLI, Maven.

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Architecture, Software Troubleshooting.

PROJECTS

MyWakil.com (Legal-Tech Platform) | React, MongoDB, Tailwind CSS, AI Integration

- Architected the backend infrastructure and guided document workflows to connect users with verified advocates.
- Engineered AI-driven consultation features by integrating Retrieval-Augmented Generation (RAG) and integrated real-time video calling capabilities.
- Designed a high-conversion, intuitive homepage UI to streamline user onboarding and simplify complex legal intakes.

CLI Banking System | Java, OOP, Data Persistence

- Engineered a foundational command-line banking application utilizing pure Java for rigorous skill development and to execute core financial operations.
- Developed robust multi-user authentication logic to ensure secure access control and session management across distinct account profiles.
- Implemented custom file-based data persistence mechanisms to reliably store and retrieve transaction histories without relying on an external database.

ACHIEVEMENTS & LEADERSHIP

Competitive Programming: Secured 6th rank in Code Sprint (2025) and advanced to the final round as runner-up in Codathon (2026). Active solver of algorithmic challenges.

Team Lead: Directed collaborative project development for the ByteVerse 7.0 National Level Hackathon organized by NIT Patna (Dec 2024 – Jan 2025).
